# Natus® Citrix® NAS Server

# Secure remote access and storage of your data

**Natus Citrix/NAS solution**

NAS

Citrix/Data server

Local Area Network
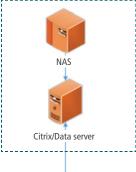

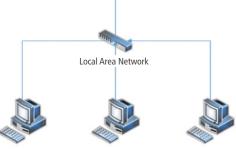

Acquisition/Reader stations

## What is a Citrix NAS Server?

The Citrix Network Attached Storage (NAS) solution from Natus provides an economical and easily-scalable solution for robust remote access and data storage. Via the Citrix application, patient data is accessible from anywhere using any compatible device connected to your network. Data stored on the server can be protected by security protocols.

## Citrix NAS Server provides:

- Easy, secure and remote access to patient data located on your network
- Secured data is stored locally at your facility without the need for 3rd party involvement
- Offers a low-cost solution with no additional per-study fees
- 16TB data storage capacity*
- Up to two users accessing data on the server simultaneously
- Desktop computer with monitor can function as an extra review station

**CITRIX ready™**

*Set up for RAID Array 1 redundancy, operational storage capacity 11TB.

**natus**®

The Citrix NAS Server from Natus leverages your clinic network and connectivity infrastructure to provide an all-in-one remote access and storage solution.

**Natus professional services is responsible for the following:**
- On-site Installation of physical components
- Remote configuration of Natus software applications
- Planning discussion with IT representative

**Your clinic is responsible for the following:**
- Providing network infrastructure and connectivity
- IT representative/resource available during planning and implementation

**Infrastructure:**
- 1 GB/sec connection recommended for server and client systems on LAN
- Public IP access and netscaler configuration must be provided by clinic IT if remote reading option desired
